# From Concept to Completion.

Building projects can seem overwhelming. You may have some idea of what you need or of what you want, but you may have no idea where to start or how to reach the finish line. When you build with Brecknock, you don't walk alone. Our team will be your guide from the beginning and will shepherd your project until it's complete. Each project is different, but no matter your needs, we are there for you every step of the way.

# Our Process

1

## **You tell us what you're looking for**

We meet with you, and you tell us what you need or what your dream is. We will answer your initial questions and gather all of the necessary information to see if your dream can become your reality.

2

## **We do the work of preparation**

We will research your site and check local codes to make sure that you can build the way that you want to build. Once we have clearance, we'll begin a detailed design, give you clear pricing, and draw up a contract.

3

## **We build your dream**

We will gather the permits, make sure the site is ready, and then begin to build. We will do much of the work ourselves, and will carefully monitor any subcontractors that are necessary for consistent quality.

4

## **You enjoy your new facility**

When the project meets our standards, and when the last inspector's papers are signed, we'll deliver a completed building to you that is clean and ready to use.

# About Us

Brecknock Builders is a family-owned operation with a long-standing commitment to quality and craftsmanship. We've been building quality steel and wood structures for residential, commercial, industrial, mini storage, and agricultural customers since 1986. In the early years of our operation, the company served the local area mainly as a sub-contractor. Our focus on superior quality, skilled craftsmanship, honesty, and integrity helped to forge relationships with local general contractors, suppliers, and developers.

Father and son team Titus and Jonathan Martin have a combined 60+ years of experience in the construction industry. In 2000, they acquired the company and grew it from twenty employees to more than forty employees. Brecknock Builders has two distinct divisions - steel and wood construction - each with its own team of specialized and experienced staff.

In addition, we are a trusted erector for a number of well-known pre-engineered metal building manufacturers and mini storage building systems. We continue to seek opportunities throughout our local and Tri-state area, within a two-hour radius of our location in Northeastern Lancaster County.

## Questions & Answers

### How Far do you travel?

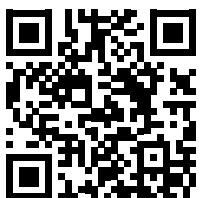

We will go pretty much anywhere within a two-hour radius of our headquarters in Denver, PA.

### Will You Help me get My Permits?

Yes! We're here to help you from start to finish. From the design and permit stage, all the way to turn-key completion.

### Are your workers messy?

Not usually. They're hardworking and well-mannered individuals who respect your property.
